Notes on bleaches color

Using the wrong detergent or soak too long ... can cause patchy colored clothing that must be discarded.

Unlike white clothes, the stubborn stains on clothing colors as lubricants, ball pen, mark curry ... need treatment measures "soft" over. If not careful, you could not remove old stains have to worry about "fighting" for the new white spot.

Water containing chlorine bleach is not suitable option for colored clothes. Inadvertently stained a few drops of water into the pot bleaching colored clothing items, Ngoc Ha (27 years old) can not salvage outfit their patchy.

Too much and too long soak is also common mistakes. Normal bleach if using a moderate dose and dilution phase can still help you cleanse colored stains on clothing. However, just for the hands a little, new shirt can turn into instant old.

Sister Bao Tram (30) each applied this approach to remove ballpoint pen stain on the blue shirt of the husband. Because the ink is too dark, the fold line is located just of pocket should you decide to Tram bleach a little more. Only an hour after immersion, ink have been spilled fade but colored shirt and lighter.

Moreover, the habit of abusing bleach when washing clothes, pillowcases, blankets ... also made fabric

items or create tiny explosions wound. In addition, unpleasant pungent smell of bleach also cause unpredictable harm to health. [Nbsp]
